How is your facility meeting the wellness policy goals? Is there anything special your facility is doing?

We are in compliance with the Child Nutrition Program, including the implementation of fresh fruits as snacks in the sections and implementation of education in school regarding nutrition and healthy eating choices.

We have implemented the S.P.A.R.K physical education program before and after school and have implemented a weekly volunteer program that allows for community volunteers to enter the facility once a week to engage in sports with the youth.

How has your facility encouraged juveniles to engage in recreation activities that include physical activity and promote good nutrition practices?

We have utilized the activity schedule and equipment included in the S.P.A.R.K. program to encourage the youth to participate in new sports activities and recreational programs.

What is your facility doing for local wellness policies events or activities?

Nothing at this time.

Is the public involved? How?

We currently have several volunteers that come to the facility weekly to play volleyball with the youth and have an outdoor volleyball pit that is utilized by both youth and volunteers, it was donated by community volunteer resources and labor.
