

FAMILY VISITATION GUIDE DURING THE COVID-19 PANDEMIC

As Utah slowly begins easing restrictions during the COVID-19 pandemic, we are adjusting our visitation to allow a single person chosen by the family to visit their child every month **by appointment only**. The visitor must be the **same person each time** and will have to undergo a health screening prior to visiting. To maintain the health and safety of the youth in our care, we can only allow one visit per month **at this time**. We will continue to allow virtual and phone visits as frequently as possible.

Upon Arrival

- Pass health questionnaire
- Have temperature taken
- Wear protective mask
- Sanitize and wash hands
- No physical contact

Visits will take place in an **open space or space that allows for physical distancing**. When not possible, a sneeze guard may be used for protection.

To remain as healthy and safe as possible, we cannot allow the family member to have physical contact during visits at this time. After every visit, the family member and youth must **sanitize and wash** their hands.
